Gutter Protection Installer

Location: Melbourne CBD & Inner Suburbs

Work type: Contract/Temp

About the role:

Contractors are required to install our gutter protection system to domestic and commercial properties and to provide ongoing maintenance at different times. The role involves working on a number of different roof types, and we require people who would be comfortable performing at a various heights. Furthermore, the nature of the industry requires people to consistently act in a responsible, practical and safe manner which means they must comply with all safety requirements and company regulations. Roofing experience would be an advantage and or trade background would help to complete the training course sooner. However, we encourage any persons with strong communication and customer service skills to apply.

Training and Support

We offer a fully paid training program in fitting methods and working at heights as per our induction process by AGP and associated safety companies. Our installers are supported by a dedicated Director, General Manager, Customer Service Team who deliver ongoing support and training.

Our comprehensive and hands on training program covers:

- Products
- Installation
- Heights and safety with associated safety companies
- Industry
- Customer service
- Site Specific Engineering
- Systems and operations

Mandatory requirements

- Drivers license
- Reliable and suitable vehicle (a ute or van is preferred)
- Suitable phone able to download apps and receive emails
- A minimum level of equipment including ladders, hand tools and some safety equipment required after induction
